INDEX TO VOLUME X.

A.

Acetylene flame, temperature of the, *Nichols*, 234.

Acoustic analyses of vowels from the phonographic record, *Bevier*, 193.

Adams, C. F., An apparatus for determining the coefficient of expansion of air at constant pressure, 178.

Aimé, G., *De l'influence de la pression sur les actions chemiques*, 190.

Air at constant pressure, apparatus for determining the coefficient of expansion of, *Adams*, 178.

Ångström, K., An objective representation of the hysteresis of iron and steel, 74.

Anodes, size of as influencing deposit of silver voltameters, *Merrill*, 167.

Arc, a dissociation theory of the electric, *Child*, 151.

B.

Baker, W. C., A lecture demonstration in wave motion, 175.

Barnes, H. T., An hermetically sealed type of Clark standard cell, 268.

Variation of specific heat of water between 0° and 100° C.

Barnett, S. J., The influence of electrification on the surface tension of water and mercury, 65.

Barus, Carl, Scheiner's *Strahlung und Temperatur der Sonne*, 126.

Transmission of the ionized exhalations of phosphorus through air and other media, 257.

Benzene, revision of some thermal data concerning, *Tsuruta*, 116.

Bevier, L., Jr., Acoustic analysis of vowels from the phonographic record, 193.

Book reviews.

American telephone practice, *Miller*, 192.

Elements of alternating currents, *Franklin and Williamson*, 189.

Elements of physics, *Crew*, 254.

Geschichte der physikalischen experimentierkunst, *Gerland und Traumüller*, 127.

Influence de la pression sur les actions chemiques, *Aimé*, 190.

Lehrbuch der experimental Physik, *Wüllner*, 63.

Ostwald's Klassiker der exakten Wissenschaften, Nos. 99 and 100, 63.

Strahlung und Temperatur der Sonne, *Scheiner*, 126.

Text-book of physics, *Watson*, 255.

Text-book of physics, *Wentworth and Hill*, 187.

Traité élémentaire de mechanique chemique fondeé sur la Thermodynamique, *Duhem*, 191.

Boyle's law apparatus, an efficient, *Humphreys*, 123.

Boynton, Gibbs' thermodynamic model, 228.

Cajori, F., Gerland and Traumüller's Geschichte der Physikalischen Experimentierkunst, 127.

Callender, H. L., Variation of specific heat of water between 0° and 100° C., 202.

Carpenter, H. V., A new method of comparing two self-inductances, 52.

Cell, an hermetically sealed type of Clark standard, Barnes, 268.

Child, C. D., A dissociation theory of the electric arc, 151.

Copper voltameter, polarization and internal resistance of, *Moore*, 34.

Crew, H., *Elements of Physics*, 254.

D.

Density and elasticity of the ether, *Fessenden*, 1, 83.

Dissociation theory of the electric arc, *Child*, 151.
Duhem, P., *Traité élémentaire de mechanique chemique fondeé sur la Thermodynamique, Duhem*, 191.

E.

Elasticity and density of the ether, *Fessenden*, 1, 83.
Elasticity of rods, effect of magnetization on, *Stevens*, 161.
Electric and magnetic quantities, determination of nature of, *Fessenden*, 1, 83.
Electrification, influence of on the surface tension of water and mercury, *Merritt and Barnett*, 65.
Ether, elasticity and density of the, *Fessenden*, 1, 83.
Expansion of air at constant pressure, apparatus for determining the coefficient of, *Adams*, 178.

F.

Fessenden, R. A., A determination of the nature of the electric and magnetic quantities, and of the density and elasticity of the ether, 1, 83.
Franklin, W. S., Aimé's *De l'influence de la pression sur les action chemiques*, 190.
Duhem's Traité élémentaire de Mechanique chemique fondeé sur la Thermodynamique, 191.
Elements of Alternating Currents, 189.

G.

Gerland, E., *Geschichte der Physikalischen Experimentierkunst*, 127.

H.

Hall, E. H., Concerning thermal conductivity of iron, 277.
Hill, G. A., *Text-book of Physics*, 187.
Hodges, N. D. C., Law of distribution of velocities among gas molecules, 253.
Humphreys, W. J., An efficient Boyle's-law apparatus, 123.
Spark-length of an electric influence machine as modified by a small spark from the negative side, 301.
Hysteresis of iron and steel, an objective representation of, *Ångström*, 74.

I.

Inductance, self, a new method of comparing, *Carpenter*, 52.
Internal resistance and polarization of the copper voltameter, *Moore*, 34.
Iron and steel, an objective representation of the hysteresis of, *Angström*, 74.
Iron, concerning thermal conductivity of, *Hall*, 276.
Iron group, magnetic molecular susceptibility of salts of the iron group, *Liebknecht and Wills*, 215.
Iron, soft, on the change in length in an alternating magnetic field, *Austin*, 180.

K.

Kimball, A. L., Crew's *Elements of Physics*, 254.

L.

Liebknecht, O., magnetic molecular susceptibility of salts of the iron group, 215.
Living body, metabolism of matter in, *Rosa*, 129.

M.

Magnetic and electric quantities, determination of nature of, *Fessenden*, 1, 83.
Magnetic field, on the change in length of soft iron in, *Austin*, 180.
Magnetic molecular susceptibility of salts of the iron group. *Liebknecht and Wills*, 215.
Magnetization, effect of, on the elasticity of rods, *Stevens*, 161.
Mercury and water, influence of electrification on the surface tension of, *Merritt and Barnett*, 65.
Merrill, J. F., The influence of temperature, pressure, used solutions, and sizes of anodes on the deposit of, 167.

Merritt, Ernest, The influence of electrification on the surface tension of water and mercury, 65.
Metabolism of matter in the living body, *Rosa*, 129.
Miller, K. B., *American Telephone Practice*, 192.
Moore, B. E., Polarization and internal resistance of the copper voltameter, 34.

N.

Nichols, E. L., Miller's *American Telephone Practice*, 192.
On the temperature of the acetylene flame, 234.
Ostwald's *Klassiker der Exakten Wissenschaften*, 63.
Watson's *Text-book of Physics*, 255.
Wüllner's *Lehrbuch der experimental Physik*, 63.

P.

Phosphorus, transmission of ionized exhalations of, through air and other media, *Barus*, 257.
Polarization and internal resistance of the copper voltameter, *Moore*, 34.
Pressure, influence of on the deposit of silver voltameters, *Merrill*, 167.

R.

Rosa, E. B., On the metabolism of matter in the living body, 129.

S.

Scheiner, *Strahlung und Temperatur de Sonne*, 126.
Self-inductances, a new method of comparing two, *Carpenter*, 52.
Silver voltameters, the influence of temperature, pressure, used solutions, and size of anodes on the deposit of, *Merrill*, 167.
Smith, H. B., Franklin and Williamson's *Elements of Alternating Currents*, 189.
Solutions, used, influence of on the deposit of silver voltameters, *Merrill*, 167.
Spark-length of an electric influence machine as modified by a small spark from the negative side, *Humphreys*, 301.
Specific heat of water between 0° and 100°C., the variation of, *Callender and Barnes*, 202.
Standard cell, Clark, on hermetically sealed type of, *Barnes*, 268.
Steel and iron, an objective representation of the hysteresis of, *Ångström*, 74.
Stevens, J. S., Effect of magnetism on the elasticity of rods, 161.
Surface tension of water and mercury, influence of electrification on, *Merritt and Barnett*, 65.

T.

Temperature, influence of, on the deposit of silver voltameters, *Merrill*, 167.
Temperature of the acetylene flame, *Nichols*, 234.
Thermal conductivity in iron, *Hall*, 277.
Thermal data concerning benzene, revision of, *Tsuruta*, 116.
Thermodynamic model, Gibbs', *Boynton*, 228.
Thompson, J. O., Wentworth and Hill's *Text-book of Physics*, 187.
Traumüller, F., *Geschichte der Physikalischen Experimentierkunst*, 127.
Tsuruta, K., Thermodynamic notes (No. 10); Revision of some thermal data concerning benzene, 116.

V.

Velocities, law of distribution of, among gas molecules, *Hodges*, 253.
Voltameter, copper, polarization and internal resistance of, *Moore*, 34.
Voltameters, silver, the influence of temperature, pressure, used solutions, and size of anodes on the deposit of, *Merrill*, 167.
Vowels, acoustic analysis of, from the phonographic record, *Bevier*, 193.

W.

Water and mercury, influence of electrification on surface tension of, *Merrill and Barnett*, 65.

Water, variation of specific heat of, between 0° and 100° C., *Callender and Barnes*, 202.

Wave motion, a lecture demonstration of, Baker, 175.

Watson, W., *Text-book of Physics*, 255.

Wentworth, G. A., *Text-book of Physics*, 187.

Williamson, R. B., *Elements of Alternating Currents*, 189.

Wills, A. P., Magnetic molecular susceptibility of salts of the iron group, 215.

Wüllner, A., *Lehrbuch der Experimental Physik*, 63.
